

Business Solutions for Maximum Performance

Automate the processes of building kits and managing components

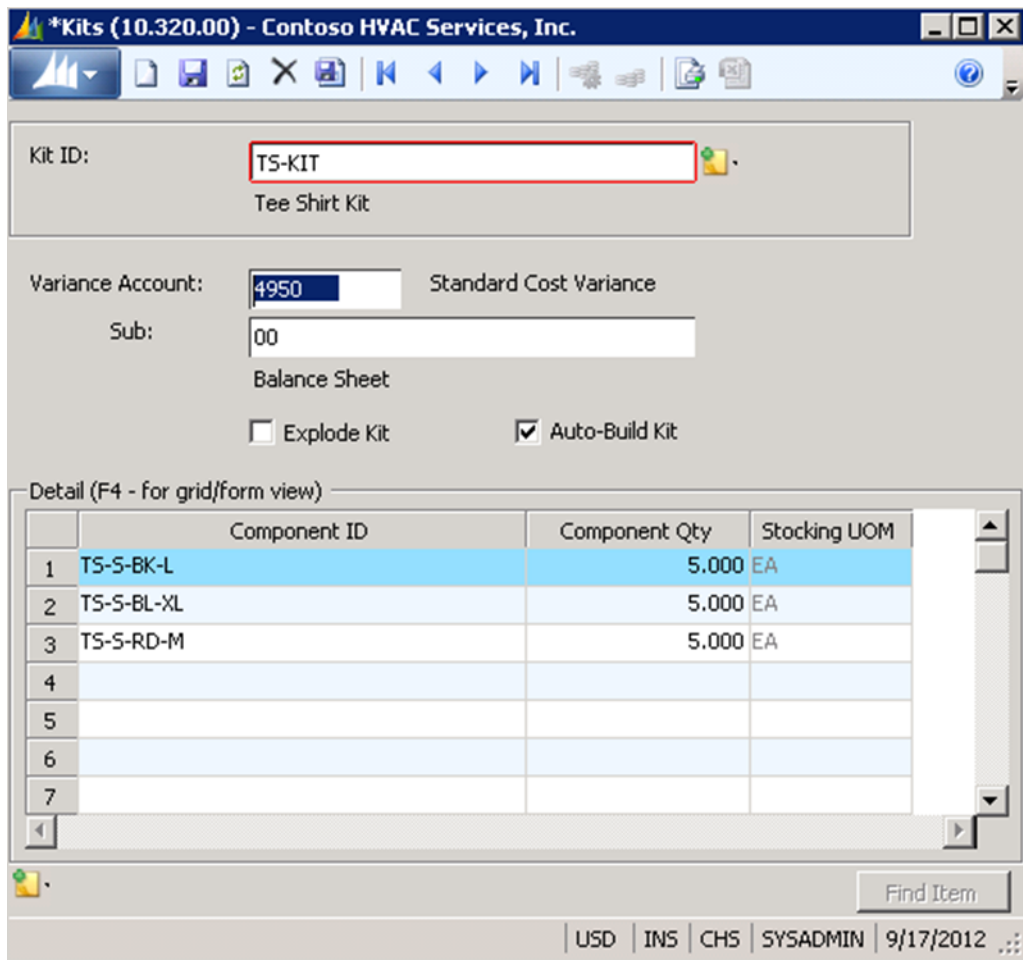

Automate the processes of building kits and managing components. MaxQ's Auto Kitting module allows you to completely manage your inventory kitting needs. As sales orders are entered, kits can be setup to automatically be created and received into inventory as needed, allowing the shipper (pick ticket) to be created as expected.

Auto Kitting

MaxQ's Auto Kitting

Automate the processes of building kits and managing components. MaxQ's Auto Kitting module allows you to completely manage your inventory kitting needs. As sales orders are entered, kits can be setup to automatically be created and received into inventory as needed, allowing the shipper (pick ticket) to be created as expected. Component shortages are analyzed and reported on, given you complete control of the shortage process. As components are received the appropriate kits will automatically create. A kit component shortage report can be run at any time detailing any kits that are short inventory.

Cpny Order	Line	Site ID	Inventory Item	Ordered	Available	
CHS	00000191	00001	SE1	TS-KIT	10.00	0.00
			Components:			
				TS-S-BK-L	50.00	50.00
				TS-S-BL-XL	50.00	50.00
				TS-S-RD-R	50.00	0.00

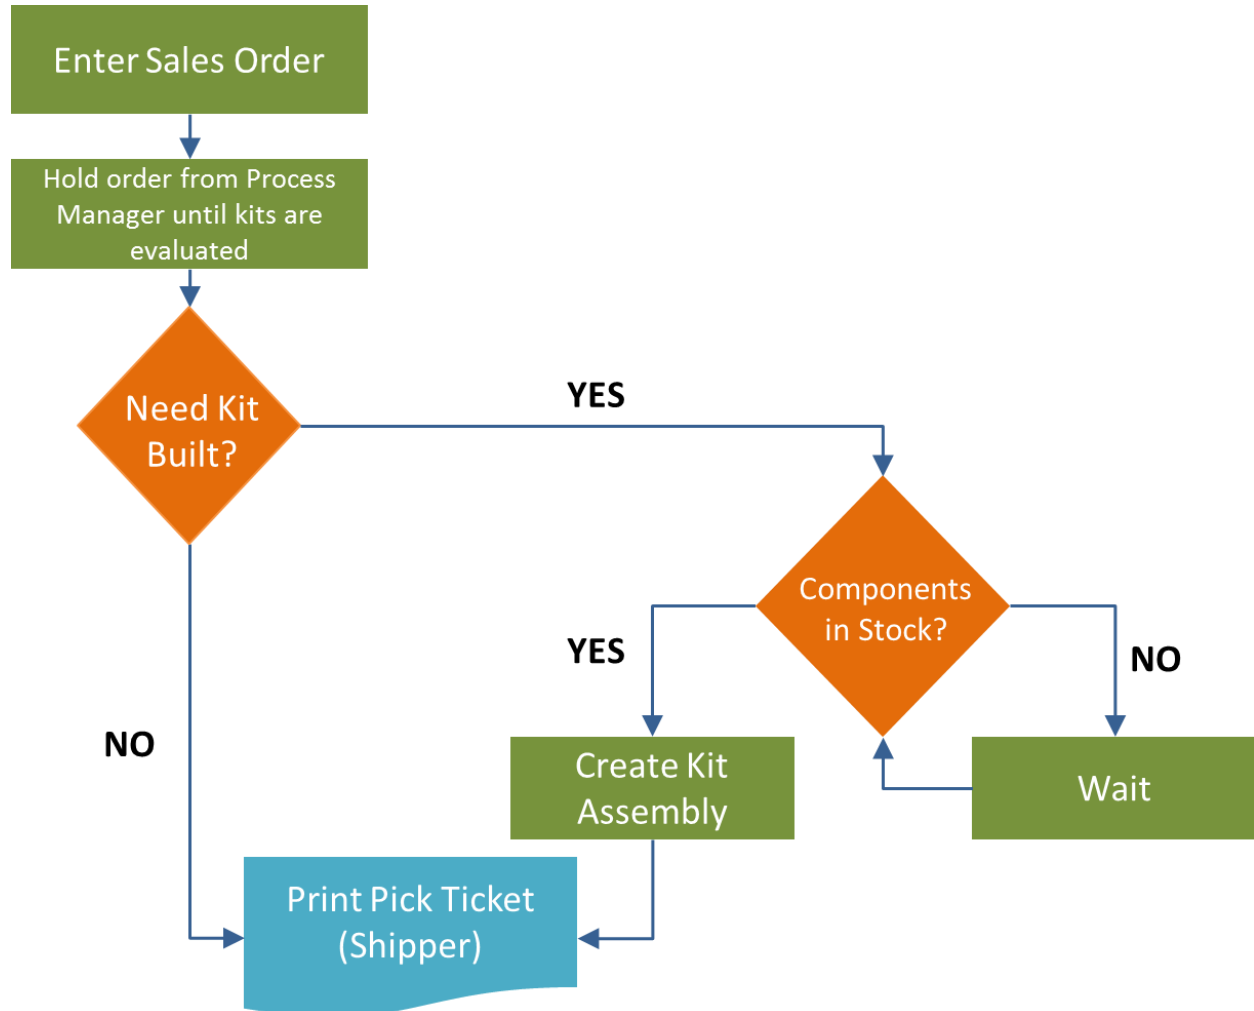

Features

- Automatic creation and receiving of kits required by a sales order
- Analyze component inventory optionally hold orders that have kits that are short components
- Automatically build kits as component inventory is received
- Pick ticket (shipper) can optionally be printed with kit components details

Benefits:

- Build kits as they are ordered
- Inventory of kits and components are much more accurate
- Shortens time needed to ship, no longer wait for manual kits to be assembled before shipper can be created
- Reduce inventory, better manage components
- System continually manages exceptions components and releases kit assemblies when appropriate
- Easy to use, flexible and efficient
