

MaxQ's ChargeIt!

Provides automated credit card processing – at the touch of a button – allowing you to realize immediate benefits through more efficient processing and streamlined operations. Whether used with Microsoft Dynamics SL's Accounts Receivable module, the Order Management module or implemented using the Charge It! Object, ChargeIt! supports all major credit card processors. It also simplifies end of day closing and automatically books all related accounting transactions.

*NEW - Upgraded Encryption Methods!
Supports SQL Server encryption
Implements automated Audit Trails
Purges cardholder data after customer defined retention periods and MORE!
Customers can also place orders via credit card payments online (when combined with the ChargeIt! Object). Once the order is submitted, customers then receive an email notification (using MaxQ's Document Agent Module) when the order is received and shipped.*

NEW FEATURES!

- Improved support for PCI compliance.
- Upgraded Encryption Methods—using SQL Server.
- Allows for deferred transactions—when credit card information is retrieved on web site, order can be created later with automatic matching.
- Credit card auditing and reporting available.
- Enhanced credit card purging.

Card Maintenance (XC.004.00)

Customer ID: C010 A. Datum Corporation

Card Information To Add

Card Number: [] Expiration Date: []
Card Name: [] Status: OK
Member: [] CVV: []
Address: [] Zip: []
Customer Code: [] Commercial Card

(F4 for grid/form view)

Card Number: 1111 Default Expiration Date: 02-11
Card Name: VISA Status: OK
Member: William H. Gates CVV: 665
Address: 26 Pearl St Zip: 06850
Customer: 0 Commercial Card

Approved Transaction History

Last Transaction Date	2/28/2008	Total # of Transactions	8

Add Card

INS CHS SYSADMIN 2/29/2008

Access the Credit Card Transaction screen directly from Microsoft Dynamics SL's Order Management module. Once authorized, click process – all AR transactions are booked automatically.

Additional Features / Functionality

- Processes transactions on-line or in batch mode.
- Gives customers the flexibility to place orders via credit card payments online.
- Automatically places rejected credit card purchases on hold and provides rejection reports.
- Leverages end user knowledge of Microsoft Dynamics SL - Easy installation and set up using familiar Microsoft Dynamics SL screens.
- Eliminates booking sales for customers who have exceeded their credit limits.
