

Business Solutions for Maximum Performance

Handle Unlimited Characteristics

And a Variety of Product Types

This module has the ability to handle an unlimited number of user defined characteristics. Matrix Inventory works for a wide variety of product attribute types used in many different industries. Whether working with size/color/style and waist/length for apparel, size/width for shoes, or pattern/color/width for flooring, MI is the right solution.

Matrix Inventory Management

MaxQ's Matrix Inventory Management (MI)

This module has the ability to handle an unlimited number of user defined characteristics. Matrix Inventory works for a wide variety of product attribute types used in many different industries. Whether working with size/color/style and waist/length for apparel, size/width for shoes, or pattern/color/width for flooring, MI is the right solution. MI adds matrix style entry windows to inventory item setup and maintenance, sales orders entry, purchase order entry and purchase order receipt entry with flexible inventory inquiries and attribute searches.

Inventory items with the ability to generate standardized item descriptions and Inventory IDs.

Benefits

Superior Processes. Takes less time to enter and maintain inventory items while reducing errors.

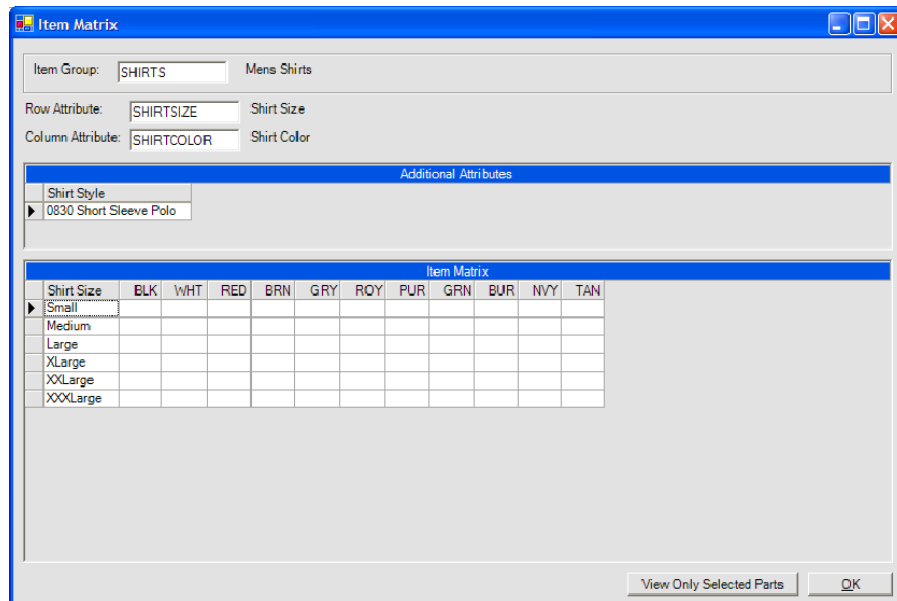

Greater Optimization. Generates standardized item descriptions and Inventory IDs.

Seamless Integration. Leverages your investment in Microsoft Dynamics SL. Automatically sets up Microsoft Dynamics SL attributes entries.

Reduced Costs. Speeds process for sales and purchase order entries resulting in increased order accuracy.

Increased Efficiency. Assign products to separate categories under the same SKU. View inventory positions by attributes. Inventory attributes allow for quick inventory item searching.

Valuable Analysis. Includes matrix reports allowing you to view your sales and/or inventory information in a "snapshot."

Flexible matrix entry with unlimited attributes; available in Inventory, Sales Order and Purchase Order Entries.

Features / Functionality

- Ability to set-up an unlimited number of item groups and an unlimited number of attributes.
- Assign color size, style, waist/length or other special attributes as needed.
- Matrix entry screens added to Inventory Entry and Maintenance, Sales Order Entry, Purchase Order entry and Purchase Order receipt.
- Powerful setup configuration allows for the grouping of items and entering of needed inventory data elements easily and quickly.
- Multiple inventory ID & description assignment methods; Auto Number Attribute, Driven or combination.
